The DURANAR color chips provided in our color guide are as close as possible to the DURANAR paint color, however color chip reproduction has limitations. Panels of the actual DURANAR finish are available upon request. The color guide represents the range of available colors, but custom color matches are available within the limits of durable color pigments.

The appearance of DURANAR finishes may vary upon factory application due to differences in spray equipment, film thickness and baking conditions, which are beyond our control. Therefore, PPG strongly recommends final color approval of actual production line samples, not lab panels or color chips.

Pearlescent and metallic flake colors are particularly application-dependent and must be verified with a production line sample including the DURANAR XL clear topcoat, as specified by PPG. Limits for acceptable production variations are to be established between the
